

ANNUAL TECH SESSION FOR THE AUSTIN HEALEY, TRIUMPH AND MG CAR CLUBS

The date, time and place have been set for this year's multi-club tech session! It will be Saturday March 16 2019 at Shoreline Community College Auto Tech Program building, from 10 am to 1 pm.

So you have packed a lunch and headed off for an enjoyable drive. The sun is shining but you find yourself coasting to the side of the road because the car quit running! What do you do now! Do you open the boot and start throwing spare parts at the ignition system? Or do you reach in the glove box and pull out your own copy of the British Car Ranch ignition failure check list and follow a time tested logical process to find the problem?

This tech session will be presented by Steve, Laurie and Christopher Day of British Car Ranch . We will explain in detail how to use this check list to gain the upper hand and get back on the road again by either doing your own repairs or gaining the knowledge to be able to tell your mechanic where to start.

How do you get your copy? Simple, register and plan to attend this tech session! Seating will be limited, so contact Frank Hosick at sidea@hosick.net and claim your seat.

As always, we have set aside time for a general question and answer session devoted to your other questions on your British Baby.

Have a question for Steve? Contact him at britishcarranch@hotmail.com .
